

Students build and grow both skills and lasting confidence. No more time or money wasted on practicing what your child does not need!

Tutoring at Achieve Learning is always individualized. Most of our math and reading programs utilize a diagnostic assessment to quickly pinpoint areas of difficulty. With those results, a personalized plan of instruction is created to meet your child's specific lesson needs.

Many children lack the confidence to succeed.

At Achieve Learning students improve their skills, confidence grows and success spills over into the classroom!

Our caring instructors excel at encouraging all students in their abilities, resulting in a powerhouse program for each stage of educational development.

Early Readers Pre-K – 1

For little ones who start early in reading or who need a stronger foundation, the Achieve Learning Early Reader programs are a perfect fit. Whether your child needs to learn letter basics or is ready for emerging reader lessons, we provide a variety of learning materials to meet the need.

Reading Program K – 12

The Achieve Learning Reading Program is a proven success for all grades. The five core areas of instruction include Phonics, Sight Words, Vocabulary, Comprehension, and Accelerated Skills such as oral reading and speed reading.

Time tested, proven materials are used to provide effective learning tools to ensure students are learning the skills needed to be successful readers.

Success Central

*Students have fun...
while working hard.*

*Paving the way for good grades in
school and fewer headaches at home.*

ACT/SAT Test Prep

Achieve Learning brings test prep tutoring to the next level. An initial diagnostic assessment pinpoints critical skill areas for each individual student. A tailored plan of instruction is created and students are set on a path that leads to better scores, better colleges, and better scholarships! Students learn testing strategies and refresh skills needed to feel comfortable taking these important tests.

Math

Achieve Learning uses a highly detailed approach to quickly target and improve weaknesses in math. Because math skills build in intensity from year to year, any gaps in foundational math can cause great concern in a student's ability to be successful in upper level math.

Finally your child can have a chance to go back and learn what the classroom did not have time to revisit in years past. Problems with fractions, decimals, integers, word problems, whole number operations, and measurement can easily become a distant memory, paving the way for good grades in school and fewer headaches at home.

Upper Level Math

For students in Pre-Algebra, Algebra I & II, and Geometry, we provide both a complete program as well as homework assistance. Understanding homework and preparing for tests and quizzes do not have to be a struggle. Math tutoring can be painless and Achieve Learning is here to help!
